Parnell Launches PropofolVet Multidose, First Generic Propofol Injectable Emulsion for Dogs

Versatile New Anesthetic Provides a Quality and Cost-Effective Alternative to Propoflo™ 28

OVERLAND PARK, Kan. (Jan. 7, 2025) – Parnell, a pet care products manufacturer focused on delivering reliable high-quality products, today announced the launch of PropofolVet Multidose, an anesthetic injection designed specifically for veterinary practices. This new solution offers veterinarians enhanced flexibility and efficiency in their anesthesia protocols while maintaining the highest standards of patient care.

PropofolVet Multidose provides veterinarians with a versatile anesthetic option for dogs, supporting both induction of anesthesia and maintenance of general anesthesia through intermittent bolus injections for short procedures. The product can also be used for induction when maintenance is provided by inhalant anesthetics.

“We understand the complex demands veterinary professionals face in their anesthesia protocols,” said Chelsie Estey MSc, DVM, DACVIM (Neurology) and Vice President of U.S. Pet Care, Parnell. “PropofolVet Multidose is an important addition to our sedation and anesthesia portfolio, which is backed by comprehensive educational support. We’re committed to ensuring veterinary teams not only have access to our products but feel confident using them in practice.”

Key features of PropofolVet Multidose include:

- Quality and cost-effective alternative to Propoflo™ 28
- First generic propofol injectable emulsion for dogs
- 28-day in-use shelf life
- No refrigeration required
- Delivers consistent, high-quality induction

The launch of PropofolVet Multidose complements Parnell’s comprehensive anesthesia and sedation portfolio, which includes Dexmedetomidine Hydrochloride Injection and CONTRASED™ (atipamezole hydrochloride). This integrated suite of products streamlines inventory management and provides veterinary practices with a reliable, complete solution for their sedation and anesthesia needs.

Pablo Lamberto, DVM and SVP and President of U.S. Operations for Parnell, says this new product perfectly aligns with the Parnell mission to advance veterinary medicine by combining accessible pharmaceutical solutions with comprehensive education.

“As the first generic propofol in the veterinary anesthesia and sedation category, PropofolVet Multidose addresses a critical market need by providing veterinarians with a high-quality, cost-effective solution that enhances practice

efficiency without compromising care standards,” said Dr. Lamberto. “We’re not just providing a product — we’re creating a complete support system for veterinary success.”

New Program Offers RACE-Approved Certification for Anesthesia and Sedation

As part of their commitment to veterinary success, Parnell offers comprehensive educational resources and support through the Foundations of Anesthesia and Sedation Veterinary Certificate program, a comprehensive educational platform designed to help elevate anesthesia competency in veterinary practices nationwide. This innovative program addresses a crucial industry need for standardized, accessible anesthesia training for veterinary professionals.

Developed by board-certified veterinarians, the program features:

- 10 comprehensive modules covering the essentials of anesthesia and sedation
- 10 RACE-approved CE credits
- Mobile-friendly, self-paced learning platform
- Interactive content focused on real-world applications
- Downloadable resources for ongoing reference

“This isn’t just another training program,” said Dr. Estey. “We’ve created a comprehensive learning experience that enables veterinary teams to feel comfortable with anesthesia and sedation while building long-term expertise and earning 10 RACE-approved CE credits.”

The combination of PropofolVet Multidose and the Foundations of Anesthesia and Sedation Certificate program represents Parnell's comprehensive approach to advancing veterinary anesthesia care. Veterinary professionals ready to enhance their practice's capabilities can contact their distributor representative or visit www.parnell.com to learn more about these innovative solutions.

About Parnell

Parnell is a fully integrated, veterinary pharmaceutical company focused on developing, manufacturing and commercializing innovative animal health solutions.
